Strategic Environmental Oil Spill Response Plan

Andøya

Map title: Access points/Adkomst

Legend

- Selected case area/Utvalgt område
- Fairway/Farled
- Fishing harbours/Fiskerihavner
- Road ending < 10 m from shoreline
- Road ending < 50 m from shoreline

HOW TO USE THIS MAP

In this map, points where the end of a road is less than 50 (and 10) m from the shoreline are indicated.

In addition, fairways and fishing harbours marked by the NCA are indicated.

This is relevant information in the planning of where oil spill response equipment may be transported into the area by ship, and from the road to the shoreline.

Not to be used for navigation

0 0,5 1 2 3 4 Kilometers

0 0,5 1 2 Nautical Miles

This map is prepared by the Sensitive Environments Decision Support Group (SensE) within Akvaplan-niva, as part of the strategic environmental oil spill response plan for the area within the map frame.

The concept and format of these thematic maps were developed by SensE, for a well drilled by Noreco Norway AS in the spring of 2012.

The concept of strategic environmental response plans was published at the IOSC conference in 2010.
